

**Cybersecurity Webinar Series**  
**Wednesdays, January 30, February 13**  
**and February 27**  
**1:30 – 3:00pm**

## **CYBERSECURITY WEBINAR SERIES**

The Independent Bankers of Colorado is excited to partner with CSI to bring you this information-packed webinar series.

Cybersecurity remains top of mind for the financial services industry. Are you doing enough to improve your security and risk management initiatives? This webinar series is designed to bring you information to help you enhance your cybersecurity knowledge, keep you abreast of the evolving cybersecurity landscape, and equip you with a multilayered approach to IT security and fraud protection.

### **TOPICS**

- The Bankers Guide to the Cybersecurity Dilemma
- An Inside Tour of the Dark Web
- Beating Cybercriminals to the Punch by Mitigating Zero Day Exploits

Join us for all three webinars or pick and choose the sessions that best meet your training requirements.

### **SESSION 1: WEDNESDAY, JANUARY 30, 1:30PM**

#### **THE BANKERS GUIDE TO THE CYBERSECURITY DILEMMA**

Bankers everywhere are facing a growing dilemma: How to address the continual threats of a rapidly evolving cybersecurity landscape. It is a challenge that demands time, attention and scarce resources. While the answer may not be easy, the most effective first step to solving the dilemma is to become “cyber aware.” In this session, you will discover what prepared banks know about today’s cyber risks and what they are doing to mitigate against them. You will leave this session armed with a list of simple steps to implement and improve your security posture.

#### **KEY LEARNING OBJECTIVES:**

- Uncovering today’s top cyber risks and what you need to know
- Identifying five simple steps every bank should be utilizing
- Pinpointing one key difference in banks that are successfully cyber aware

**Presenter:** Steve Sanders, Vice President of Internal Audit, CSI

### **SESSION 2: WEDNESDAY, FEBRUARY 13, 1:30PM**

#### **AN INSIDE TOUR OF THE DARK WEB**

Sure, you have heard about the “dark web,” but really, what is it? Essentially, the dark web is a cybercriminal’s playground – and your worst nightmare. You need to know not only what is out there, but also what is on there. By learning more about it, you can be more proactive in protecting your institution. In this session, a security expert will shine light onto the harsh realities of the dark web and provide you valuable knowledge on how cybercriminals operate in this “underground” black market.

#### **KEY LEARNING OBJECTIVES:**

- Understanding how cybercriminals access the dark web and what they use it for
- Examining the types of data and other nefarious materials available there
- Identifying how cybercriminals use the dark web to facilitate today’s most prevalent cybercrimes

**Presenter:** Tyler Leet, Director of Risk and Compliance Services, CSI

## SESSION 3: WEDNESDAY, FEBRUARY 27, 1:30PM

### BEATING CYBERCRIMINALS TO THE PUNCH BY MITIGATING ZERO DAY EXPLOITS

Zero day exploits are a serious threat to any bank. Sure, cybercriminals are lurking everywhere, but when a known vulnerability emerges, they can double down on their efforts to exploit it instantly. For that very reason, community banks need to have a plan in place to mitigate zero day exploits. Join us for this session where we'll explore the timeline and lifecycle of dealing with an exploit – from the moment it's identified to the time a fix is released. We'll also examine real-world examples that CSI's Support Desk has encountered and offer advice on how to handle such scenarios. You'll walk away with practical tips for beating cybercriminals to the punch when it comes to mitigating zero day exploits.

#### KEY LEARNING OBJECTIVES:

- Defining zero day exploits and why community banks should be aware
- Reviewing real-world examples of how such exploits have affected other banks
- Identifying best practices for mitigating zero day exploits at your institution

**Presenters:** Rachael Schwartz, Business Development Director, CSI  
Stephen G. Smith, CISSP – Manager, Network Operations & Security Services, CSI

### WHO SHOULD ATTEND

This webinar series is designed for information security officers, compliance officers, information technology officers, presidents, directors, auditors, and others wanting to learn more about cybersecurity.

### WEBINAR INCLUDES

- Handout
- Availability to access the webinar on Desktop, Mobile and Tablet
- Presenter's contact information for follow-up

### REGISTRATION PRICING

Register for the entire 3-part series and Save or pick and choose the session(s) that best meet your personal and professional learning objectives.

	Series Webinar Pricing	Individual Webinar Session
IBC NGBL Members	\$50	\$30
IBC Education Members	\$75	\$55
IBC Members	\$100	\$80
IBC Non-members	\$175	\$155

This seminar will be conducted *via* webconference. This allows an unlimited number of people to participate from your location. This seminar provides training and allows for questions to be answered without time away from the bank. You will receive the phone number to call, web link and reservation number prior to the seminar(s). Pricing is per location/phone line **NOT** per bank. Registration deadline is one week prior to the offering. The IBC reserves the right to cancel any program for which there is insufficient funds to cover the expense of the program. In the event of cancellation by IBC registration fees will be refunded.
